Solve Me First ☆

ProblemSubmissionsLeaderboardDiscussionsEditorial

Complete the function solveMeFirst to compute the sum of two integers.

Function prototype:

int solveMeFirst(int x, int y);

where,

- x is the first integer input.
- y is the second integer input

Return values

- sum of the above two integers

Sample Input

x = 2
y = 3

Sample Output

5

Explanation

The sum of the two integers *x* and *y* is computed as: **2 + 3 = 5**.

C++

```
1 #include <cmath>
2 #include <cstdio>
3 #include <vector>
4 #include <iostream>
5 #include <algorithm>
6 using namespace std;
7
8 int solveMeFirst(int a, int b) {
9     // Hint: Type return a+b; below:
10
11 }
12
13 int main() {
14     int num1, num2;
15     int sum;
16     cin>>num1>>num2;
17     sum = solveMeFirst(num1,num2);
18     cout<<sum;
19     return 0;
20 }
```
